

MUNAZZAH ZAINAB

UI/UX Designer • Former Software Engineer

Kolkata, India | +91 8334871114 | zainabmunazzah14@gmail.com | [LinkedIn](#) | [Portfolio](#)

SUMMARY

UI/UX Designer with 3 years of software engineering experience, designing interfaces I understand well enough to build. Experienced across the full design lifecycle from research and information architecture through high-fidelity UI and developer handoff. Technical background in Java and Spring Boot means I design with implementation in mind, not as an afterthought.

PORTFOLIO PROJECTS

FIGVELOPER — Design-to-Development QA Platform | Web Application

- End-to-end product design for a platform that places Figma frames and live coded websites side-by-side for real-time comparison, discrepancy pinning, and resolution tracking — built from a real problem across three client projects.
- 20+ screens, complete design system, role-aware UI for four user types — Designer, Developer, PM, Scrum Master.
- AI-assisted workflow using Google Stitch AI for screen generation; all design decisions, system consistency, and editorial polish applied manually.

PANTRIO — Smart Grocery & Pantry Management | Mobile Application

- Mobile app designed to reduce kitchen management mental load — user research with 5 participants, barcode scan flow, expiry tracking system, and AI-powered recipe suggestions from expiring items.

EXPERIENCE

UI/UX Designer | Weblynks — Client Collaboration • Remote

2025 – Present

- Delivered end-to-end UI/UX for three client projects — House of Shaarag (luxury architecture), Ecopath (sustainable road development), and Akashdeep Design Studio (architecture portfolio).
- Designed user flows, information architecture, wireframes, and high-fidelity responsive interfaces; conducted design QA against live implementations across all three projects.
- Presented design rationale to clients and developers, aligning user needs, business goals, and technical feasibility.

Junior Software Engineer | Cognizant Technology Solutions • Kolkata

2021 – 2024

- Developed enterprise applications using Java and Spring Boot in Agile teams; built responsive React UI components ensuring cross-device consistency.
- Cross-functional Agile experience that directly informs how I approach developer handoff and feasibility-aware design.

SKILLS

UX / UI – User Research, Journey Mapping, Information Architecture, Wireframing, High-Fidelity UI, Design Systems, Interaction Design, Prototyping, Product Thinking, Usability Testing, Accessibility

Tools – Figma, Sketch, Miro, Relume, Webflow, Google Stitch AI

Engineering – HTML, CSS, Java, Spring Boot, React, Git, JIRA

Collaboration – Cross-Functional Collaboration, Stakeholder Communication, Design Critique, Agile Delivery

EDUCATION

B.Tech — Information Technology • St. Thomas' College of Engineering & Technology, Kolkata

2021

DGPA: 9.32

Google UX Design Professional Certificate • Google / Coursera

2024
